GAME IDEA

APT STYLES

STORY

MECHANICS

Story driven choice making.

Controls are similar to Lise is strange, but the player is a lot more involved in the action.

3rd Person

As a pigeon, too space to flap wings, and no space to glide.

When on to ground, it's to move, it's just to fly, not sure if want a jump

Animal rights

Pollution

Baccy and Martin make some decisions.

Equilibrium - main characters are established, and they live through playable sequences.

Hidden resolution gets turned into pigeon paradigm, and they live are shown and figures like humans. Hillarious Martin get in some drag situations, but also next new strands and love.

Cartoonish enough so that the figures seem reasonable their human designs.

I don't know Baccy and Martin might save the day, but it depends on player choices.
